Projects:

1] Fake Currency Detection Using Image Processing

- Identify Money is real or fake using Image.
- Compare the Money with original Money .

2] Personalized Career & Skills Advisor:

- A web-based platform that provides personalized career guidance and skill development recommendations.
- Tech Stack used: HTML, CSS, JS, Python (Flask, Pandas)

3] Calculation of Heavy Metal Pollution Index:

- Categorizes water quality into low/moderate/high polluted.
- Provide map-based visualization (hotspots).
- Tech Stack used: Streamlit, Pandas, NumPy, Pydeck.

Certifications:

- For participating workshop of Data Science
- Compilation Certification of Digital Productivity
- Certificate of participating Internal College level SIH Hackathon

Qualification:

1] Indira College of Engineering and Management, Pune

BE in Artificial Intelligence and Data Science

2] Dada Patil Mahavidyalaya, Karjat

HSC – 60.50%

3] New English School Chande Budruk

SSC – 87.20

Technical Skills:

- Programming languages: C++, Python, OOP.
- Tools and IDEs: Git, Github basic, VS code, JupyterLab, MySQL.
- Libraries: NumPy, Pandas, Matplotlib, PowerBI.
- Coursework: DBMS, Operating System, Data structure and Algorithm, Pattern Recognition, Computer Network
- ML/DL Frameworks: PyTorch, TensorFlow

Extracurricular:

- Selected at college level internal hackathon (SIH)
